

K-12 Educational Acer Reference Accounts

Case Study: Decatur County School System, GA

Customer

The Decatur County School System in Georgia serves eight schools – five elementary, two middle and one high school.

Challenge And Solution

1. Integrating video in the curriculum to impart 21st century skills.

2. Working smarter not harder with shrinking budgets.

- 2500 Acer Desktops in the school system.
- Desktop workstations are being fitted with a microphone each and utilizing the “BSR Screen Recorder” program, a video of the classroom instruction is being created. It will allow absentee students to catch up at a later date or remotely.
- A central repository of this video library of instruction materials is being created on a video server, with assistance from students – providing them with critical 21st century skills.

Why Acer

- Performance
- Reliability and Cost-Effective
- Durability
- Customer Support

Decatur County Schools
Educational Excellence

Mission Statement

The mission of the Decatur County School System is to strive for excellence in meeting the needs of each learner and inspiring lifelong learning by maximizing the use of all available resources.

“Acer Desktops have proven to be very reliable for our implementation, allowing us to focus our time and resources on developing new methods of imparting 21st century curriculum, like video integration.”
